For: Outlet Manager, Merlion Brewhouse Boat Quay (MCB-BQ) | Source: AI Command Centre Operations Control Review, Finding 2 | Prepared: 10 Sep 2026

REPORTING CUTOFF: historical findings as of 30 June 2026 (report period 29 Jun 2025 - 30 Jun 2026). All five items were unmapped as at that date, not necessarily today. Check current POS configuration first, then map whichever remain unmapped.

What we found (as of the 30 Jun 2026 cutoff)

As at the cutoff, Boat Quay had the largest unmapped-till-item total of the group's five outlets. Five ALL-CAPS till button names had never been matched to a menu item, so this sales activity was invisible to product-level reporting even though it was really being sold. All five are recognisable products (a pandan cream ale, barramundi tacos, a draft beer, a chilli prawn pizza) rung under free-text abbreviations instead of the standard mapped name. Each first appeared between 2 May and 5 June 2026. This is a historical snapshot — confirm current status against the live POS before acting.

Action requested

- **First:** check current POS configuration for which of these five buttons remain unmapped today (the table reflects the 30 Jun 2026 cutoff, not necessarily today).
- **This week:** map whichever remain unmapped to their correct menu items — use the accompanying Excel checklist to assign an owner and track completion.
- **Ongoing:** audit till naming conventions so new items get the standard mapped name from day one, not a free-text abbreviation.
- **Flag onward:** warn outlets launching similar new items now, since these were brand-new when first rung (May-Jun 2026).

Verified: 186+102+124+112+42 = 566 lines; 256+162+175+155+63 = 811 units;
3,968+3,402+2,975+2,945+1,701 = SGD 14,991.00 — reconciles exactly to the report's Finding 2 table and to out_unmapped_by_outlet.csv (Boat Quay row). Recomputed 10 Sep 2026.
